PROFESSIONAL SUMMARY

Motivated Computer Science student combining technical expertise with systems thinking and leadership exposure. Hands-on experience in AI agent development, full-stack web technologies, and Firebase-based backend integration. Strong analytical and communication skills, with a focus on building responsible, impactful, and real-world technology solutions.

CORE COMPETENCIES

Programming Languages: C, Python, Java
Web Technologies: HTML, CSS, JavaScript
Backend & Cloud Services: Firebase (Authentication, Firestore/Realtime Database, Hosting)
AI & Intelligent Systems: Voice-based AI Agents (ElevenLabs), AI Fundamentals, Gen AI
Systems & Core CS: DSA, OS, CN, DBMS
Development Practices & Tools: Version Control (Git), GitHub, SQL

EDUCATION

Sir M Visvesvaraya Institute of Technology
Bachelor of Engineering in Computer Science, CGPA: 9.26/10.0

Bengaluru, India
October 2023 – June 2027

HKS PU College
Class XII: 94.3%

Karnataka, India
2021 - 2023

HONORS & AWARDS

FFE Scholar – Foundation for Excellence

November 2023 - Present

- Merit-cum-means scholarship awarded for sustained academic excellence, leadership potential, and commitment to social impact.
- Selected through a competitive multi-stage national evaluation process involving academic performance and leadership assessment.
- One of 4,700+ new scholars selected nationwide in 2023–24 from 11,000+ eligible applicants.
- Actively engaged in FFE leadership, mentoring, and entrepreneurship initiatives.

TECHNICAL PROJECTS

Kalasetu: AI-Powered Artisan Marketplace with Real-Time Firebase Integration

August 2025 - November 2025

[Live Link](#)

- Developed Kalasetu, an artisan marketplace platform using Firebase, Firestore, Cloud Storage, and JavaScript to connect traditional craftspeople directly to customers worldwide.
- Accomplished real-time product synchronization across multiple devices within 200ms latency as measured by Firestore .onSnapshot() listeners by implementing Firebase WebSocket architecture connecting artisan uploads to customer marketplace views instantly.
- Enabled secure artisan authentication for 100% successful login rate as measured by configuring Firebase Authentication with email/password validation and localStorage session persistence using vanilla JavaScript
- Deployed globally accessible marketplace with 1.2-2.0s page load times as measured by Firebase Performance Monitoring by utilizing Firebase Hosting CDN and Cloud Storage for product images serving.
- Created AI-powered storytelling feature generating heritage narratives for 100% of uploaded products as measured by form submission validation by building JavaScript template engine integrated with product description inputs and Firebase Firestore storage.

ADDITIONAL QUALIFICATIONS

Certifications: “Special Recognition for exceptional Agentic AI project” in FFE-TiE entrepreneurship FY 2025, Global Leadership Program on Systems Thinking, Aspire Leaders Program from Harvard Business School, Generative AI with AWS

Soft Skills: Critical Thinking, Problem-Solving, Leadership, Stakeholder Communication

Languages: English (Fluent), Kannada (Native), Hindi
